

SAVE TIME. SAVE MONEY. ENJOY FASTER BACKUPS.

Your organization faces many challenges every day. Protecting your critical data against data loss and disasters shouldn't be one of them.

Protect your entire infrastructure and solve your backup challenges with Symantec Backup Exec 2014 – the faster, stronger backup solution.

Backup Exec 2014

Symantec Backup Exec 2014 is a powerful backup and recovery solution that will protect your organization's entire server infrastructure. It rapidly backs up your local and remote data to virtually any storage device including tape, disk and cloud. Eliminate the need for multiple backup products with a consolidated solution that backs up your physical and virtual servers – Backup Exec 2014.

WHAT'S NEW in Backup Exec 2014

Improved speed and performance

- Backup and deduplication speeds just got faster ... up to 100% faster compared to Backup Exec 2012, letting you backup quicker, save time and reduce your backup windows.

Increased visibility and simplified management

- Job monitor is back! Now, you can monitor the status of all your backup jobs from one convenient view.
- The return of multi-server backup jobs allows you to scale management and simplify the creation of backup jobs, reducing time and resources needed for support.

Faster and seamless upgrades

- Upgrading never felt so good. Backup Exec 2014 allows you to quickly and easily get up to speed and continue protecting your infrastructure while maintaining all existing settings and policies.

With Backup Exec 2014, you can:

- Get up to 100% faster backup and deduplication speeds compared to Backup Exec 2012.
- Protect an unlimited number of servers and applications.
- Reduce data backup storage by up to 90%.
- Restore an entire server, virtual machines, applications, files/folders or individual objects from a single pass backup.
- Minimize downtime and data loss by recovering what you need, when you need it.

Latest platforms and applications support

- Full support for Windows Server 2012 and Windows Server 2012 R2 means you can backup and recover at any level, whenever and however you need it.
- Granular Recovery Technology (GRT) for Exchange 2013 and SharePoint 2013 makes it simple and fast to restore your business data, saving you time and effort.
- Support for the newly released SQL 2014.
- Deep integration with Hyper-V 2012 and vSphere 5.5, including new enhancements enabling physical to virtual conversions without the need for a backup job.

Enjoy incredible storage savings via deduplication

- Keep pace with growing data via Backup Exec 2014's integrated, block level deduplication technology.

Backup Exec 3600 Appliance

The Backup Exec 3600 Appliance is the only solution that provides Backup Exec software running on optimized hardware with 5.5 TB of internal deduplication storage. Protect your physical and virtual environments with a single, easy-to-use solution.

Why you should choose SHI
