

# SaaS COST OPTIMIZATION SERVICES

Contain your SaaS footprint and realize full value from your SaaS spend with SHI's technology and services solution.

Left unchecked, your SaaS use can easily spiral out of control and become a substantial source of wasted spend and risk to your organization.

#### VISIBILITY → COST CONTROL → OPTIMIZATION

Combining the latest SaaS discovery and software recognition technologies with expert licensing knowledge from SHI's team of Software Asset Management (SAM) professionals, our SaaS Cost Optimization Services are designed to help you quickly take back control of your SaaS usage, manage costs, simplify technology governance and reduce security risks.

The combined benefits of SaaS discovery technology and licensing professional services will help uncover the true scale of SaaS usage across your organization, accurately identify SaaS costs (even where standard payment processes have been bypassed) and ensure your applications are being closely monitored.

What's more, our experts will then leverage the data available to help you with anything from defining procurement and provisioning policies, to proactively managing key SaaS vendors.

#### OPTIMIZE SaaS USAGE AND SPEND AT EVERY OPPORTUNITY

With **SHI's SaaS Cost Optimization Services**, you get visibility into SaaS usage and spend data to help you:

- Reduce wasted spend by identifying redundant & duplicate applications
- Enhance security by monitoring unauthorized and risky applications
- Optimize consumption by redeploying under-utilized subscriptions
- Streamline procurement & provisioning by consolidating SaaS contracts & vendors

#### WHY OUTSOURCE YOUR SaaS MANAGEMENT CHALLENGES TO SHI?

upon request.

Managing cloud-based software is a growing responsibility for already-stretched ITAM teams, requiring new skills and technologies that aren't a part of your program today. Working with SHI is like building your own in-house SaaS optimization team, but without the hiring delays, payroll, onboarding and training!

Our flexible service tiers mean that we have a solution to fit your organization's exact requirements. Whether you're looking for standard SaaS discovery and reporting or to optimize SaaS at every stage of the contract lifecycle, our experts are on hand to monitor, maintain and drive optimization recommendations to ensure your environment remains optimized and you realize maximum value from your SaaS spend.
