

SHI Device Provisioning

Deploy pre-configured devices and systems for immediate workforce productivity.

Traditionally, organizations don't procure devices and hand them out to their workers, or install them into datacenters, conference rooms, etc. without applying configurations that are unique to them and enrolling the devices in a device management system.

But the device provisioning and enrollment process can be a challenge, and a strain on limited IT resources, especially for organizations where a portion of their workforce is remote. The challenges include:

1. **Centralized IT staff and de-centralized workforce.** IT must receive the device, provision it, and then ship it to the employee, which leads to
2. **Downtime** between employee onboarding and the readiness and availability of their provisioned device
3. **Inability to scale IT staff** to maintain the volume of manual device provisioning and enrollment

SHI device provisioning benefits

- Increased workforce satisfaction with rapid access to new devices
- Reduced workforce anxiety around device refresh
- Reduced strain on internal IT resources
- Faster device delivery to workforce by reducing touchpoints

To support organizations like yours, we are introducing SHI Device Provisioning, a service that adds value by pre-configuring your custom image onto a device so when your users receive their devices, they can just enter their log-in credentials and start working immediately because the software applications they need to do their jobs effectively are already set up and initialized.

Why SHI? our Expertise. Your business outcomes. SHI is uniquely positioned to help.

At SHI, our experts have all the tools at their disposal needed to provide you with a complete end-to-end device provisioning experience.

Dedicated Provisioning Capabilities

We have a dedicated U.S.-based configuration center as well as a trusted global partner network to provide this service to organizations regardless of location.

Reduced Logistics Costs

We orchestrate our services based on where devices are being shipped to, which can reduce logistics costs.

Core Service Delivery

Device provisioning is a core service for us, ensuring that high-quality, accurate work is completed and delivered to you the first time.

Don't wait. contact SHI today.

Ready to work with a technology partner that can simplify device imaging, provisioning, and enrollment while freeing up your IT resources for higher value tasks? Contact us today and learn how easy it can be to start your journey.
