

Audit Management

When it comes to compliance, we've got your back.

Received a letter from a publisher regarding an audit? Looking to conduct a thorough audit readiness evaluation? SHI's Audit Management team is here to help! Our team of certified ITAM experts and former auditors will review your assets, speak to publishers on your behalf, advise you on best practices, and coach you through the necessary steps toward becoming or remaining compliant.

Audit Management three-step process

1. Discovery

We will have an introductory conversation to discuss and review your organization's specific needs.

2. Proposal

Our ITAM experts will customize a proposal based on your unique software landscape and compliance position.

3. Remediation

Our Audit Management experts will establish an Optimized License Position for the identified publisher(s), looping in legal support when needed.

Compliance data is provided in real time and our experts are readily available to help you take corrective action immediately.

We will help you negotiate post-audit contracts best suited for your environment and will even contact publishers directly on your behalf.

Benefits

- Cut costs by finding unused licenses
- Free up internal resources for other projects
- Obtain accurate compliance data
- Lower non-compliance risk
- Discover software licensing issues that affect IT planning and business decisions
- And more!
