

Device as a Service

Provide a modern device experience and ensure end-user productivity, all while keeping costs down.

Organizations face a unique set of IT challenges as they prepare to fully support a hybrid workforce:

- Supporting staff with a seamless user experience across a more diverse range of device types
- Procuring and provisioning distributed devices in a cost-effective and efficient manner
- Delivering support in a distributed environment
- Managing technology refreshes in a cost-effective way

SHI's Device as a Service solution addresses all these unique challenges and more by ensuring your users have the devices they want and the support they need to be productive. The device's entire lifecycle is managed based a predictable, monthly, per-device cost.

All-inclusive managed services

Whether you are looking for a fully managed service or an opportunity to free up internal resources for other projects, our experts will work with you to design a customized service that meets your needs and maximizes the value of your investment.

Vendor neutral/customer-defined OEM preference

The choice of devices is in your hands. Regardless of whether you have standardized on a single hardware OEM or have engaged with multiple vendors, we are uniquely positioned to find the best devices to support your end-user needs.

One contract; flexible financing models

Our financing models allow for predictable monthly payments and simplified financial forecasting. Whether you want to make a capital investment in devices, or move to an OpEx funding model, we can provide options to suit your business needs.

Full device lifecycle management

We provide comprehensive management of all your devices across every stage of the asset lifecycle. From custom configuration, Zero Touch Deployment and touchless support, to EPA-compliant asset disposal services, we are committed to refreshing existing devices to keep your end users productive and operational.

Device as a Service Benefits

Improved user experience

- Pre-planned refresh cycles
- Faster delivery to end user
- Clearly defined support SLAs
- Reduced downtime

Complete device management

- OS and critical updates
- Dedicated project manager
- Improved asset tracking and reporting
- Enhanced end-of-life capabilities

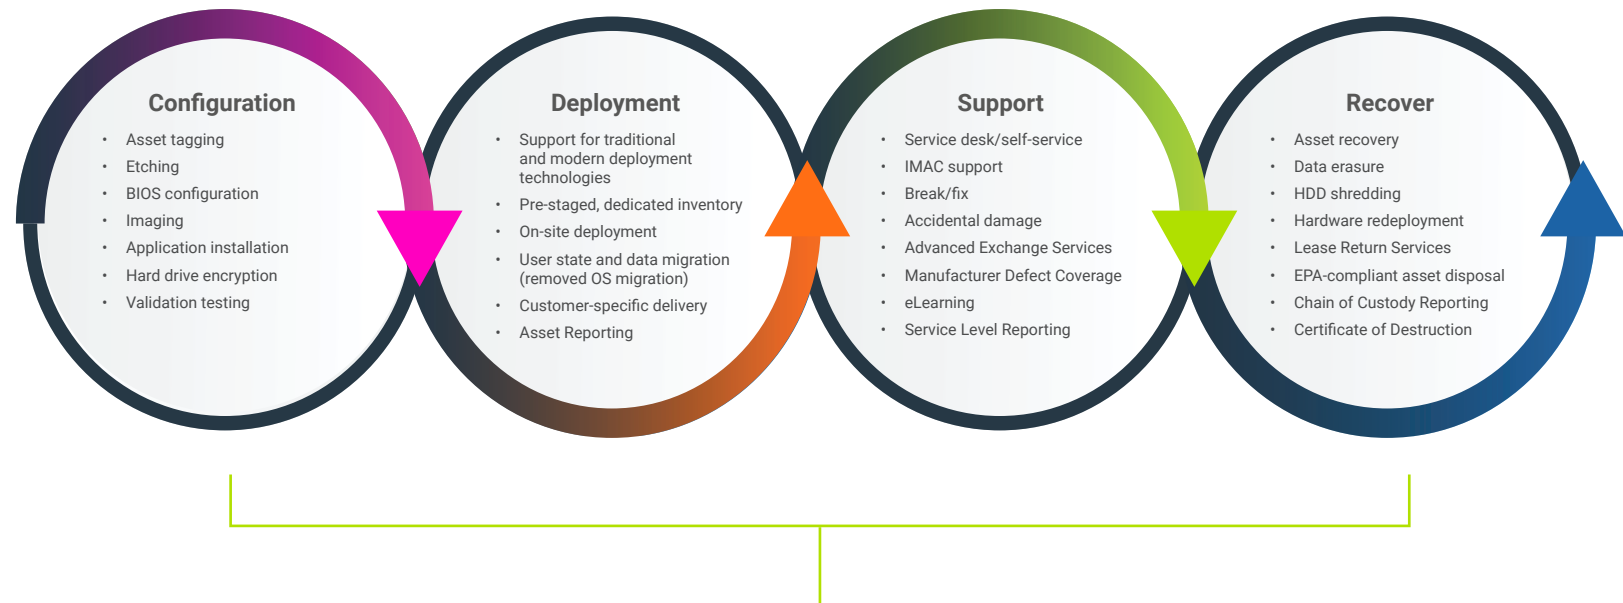

Reduced costs

- Fixed and predictable monthly payments
- Predictive maintenance to ensure productivity
- Free up IT staff for more strategic initiatives

Device as a Service

Provide a modern device experience and ensure end-user productivity, all while keeping costs down.

Devices: Laptops | Desktops | Tablets | Smartphones | Hosted Workspaces | VDI

Every partnership includes an assessment of existing operational processes and procedures, as well as a customized transition and operational plan. Our experienced team will work with you to build a program that helps you mature your practices and continuously improve on the value they deliver.

Our team of professionals includes hands-on expertise for every type of end-user device you need to manage, regardless of the OEM. We can scale up or down with the right resources needed to support small and large environments. We offer both depot and on-site deployment and repair services, and can tailor the right solution to your needs.

Ask us how Zero Touch X, SHI's innovative over-the-air provisioning (OTAP) deployment solution, can help you accelerate hardware deployments and increase user productivity.

Optimize your resources and maximize your budget with Device as a Service: a simpler, more cost-effective approach to device management.
