SHI

CO2Neutral™ IT Asset Recovery Program

Introducing CO2Neutral™ IT Asset Recovery from SHI

SHI has partnered with Carbon Neutral to provide a practical, cost-effective solution for organizations who want to get cash back and carbon credits for their aging and unwanted IT assets.

VERIFIED CO2 NEUTRAL™ VIA REGISTERED CARBON CREDITS AT CO2NEUTRAL.CA

How it works:

Step 1: Asset Appraisal

Contact SHI to identify the End-of-First-Life™ technology (aging and unwanted IT assets) you are looking to dispose of and SHI will provide you with an appraisal detailing what your assets are worth.

Step 2: Trade & Sanitize

SHI's partner, Carbon Neutral, will securely pick-up and transport your IT assets to an ISO-certified processing facility where they are audited, tested, de-branded and wiped clean in accordance with National Institute of Standards and Technology 800-88 Guidelines for Media Sanitization.

Step 3: Get Paid

We will convert your securely sanitized assets into cash by selling into established markets. Carbon Neutral will generate certified carbon credits using their proprietary carbon credit generation protocol. These are then transferred back to you.

SHI
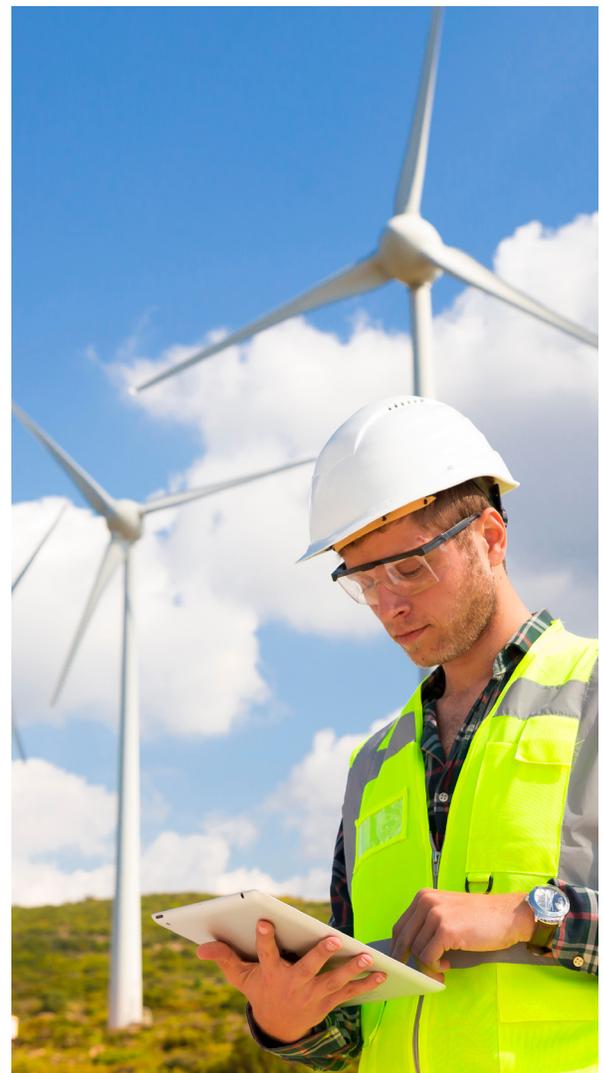

Why Go CO2Neutral?

Receive cash back and/or account credits for the resale value of your refurbished IT.

Be proud that you are making carbon neutral IT decisions at a time of growing demand for sustainability.

Save thousands of dollars in storage and disposal costs by trading in your unused IT assets.

Join the conversation and be a trail-blazer in reducing your carbon impact by participating in this program.

Benefit from peace of mind knowing that your organization's sensitive data has been securely and appropriately removed with a NIST-compliant data wipe.

Offset your carbon footprint and add legitimacy to your carbon reduction goals with verified carbon credits that are registered and serialized on the CSA's CleanProjects® Registry.
