## SaaS Management

ITAM Saas Management is designed to empower your team with complete visibility and control over your software.

## All of your SaaS applications. One platform.

Using our intelligent SaaS management platform, our ITAM experts analyze your software environment with real-time visibility into all of your SaaS applications (paid and free), including spend, usage, security, and compliance - allowing you to proactively manage licensing, renewals, shadow IT, and more.

#### Manage spend

Discover your organization's software subscriptions and receive custom reports on spend, security, and usage data.

## Optimize usage

Reveal shadow IT and deep usage metrics, decentralize stack management by team or role, and deprovision unused licenses.

### Bolster security and compliance

Audit high-risk apps, comply with data-privacy regulations, and monitor unauthorized applications.

#### SHI's security promise

Keeping your data secure is our mission. Our ITAM team will only pull in the SaaS data you want and provide full transparency on how we access and manage data.

#### Benefits of Intelligent SaaS Management

- Central platform
- Manage spend
- Optimize usage
- Bolster security and compliance
- Proactive renewal alerts
- Uncover unused apps & licenses
- Reveal shadow IT

#### SaaS Management

The very ease of use that draws users to SaaS applications often leaves IT teams with the messy job of managing and controlling the ever-growing number of subscriptions and licenses.

#### SHI Solution: SaaS Management Problem: SaaS management nightmare

#### Customer Challenge: SaaS Sprawl

Manage all of your SaaS applications in one central platform

#### **Creating SaaS Headaches**

- Data stored in disparate systems
- No visibility into spend & utilization
- Wasted spend on redundant apps and inactive licenses
- Compliance risks from unapproved apps
  (shadow IT)
