SHI Labs

Fast-track your digital transformation with evidence-based scenarios from SHI Labs.

Staying ahead of the curve in the ever-changing digital world is crucial for the success of your organization. SHI Labs is here to help you do just that. With an 8,000-square-foot state-of-the-art facility, we design everything to help customers evaluate and implement complex IT solutions quickly. Our diverse team of experts and industry-leading partners can help you assess, design, and integrate the latest data center, end-user computing, cybersecurity, and cloud technologies.

SHI Labs' certified, industry-experienced engineers support your business outcome and use-case requirements by offering access to the best emerging technologies. By utilizing the lab resources and expertise available, you can establish evidence-based decisions that lead to high-confidence results and budget attainment. Take advantage of this valuable resource to support your transformation strategy today.

Bring ideas to life

SHI Labs allows you to design, test, and evaluate solutions from SHI's industry-leading partners before you decide, so you have the details you need to make informed decisions.

Data center

See demos and proofs of concept (POC) for data center solutions that address current and future challenges. In our labs, you'll be able to evaluate out-of-the-box and integrated solutions without commitment. SHI's experts will demonstrate how you can build, modernize, move, protect, or retire your existing data center while ensuring maximum efficiency and security.

End-user computing

Envision how applications transition from the data center to end-user devices. SHI Labs can test, measure, and monitor device performance to ensure positive end-user experiences. Our engineers also offer hands-on access, demonstrating how to increase workplace flexibility and agility while controlling hardware lifecycle costs.

Pilot testing

Conduct POCs in our experimental environments without prior commitment, or partner with our lab team for testing services and technical support. Whatever the process, we'll find the solution that fits best for you!

Multicloud platforms

Access a virtual sandbox on Amazon Web Services, Google Cloud Platform, and Microsoft Azure for quick custom solution-building and an interactive evaluation that ensures your decisions are informed.

Cybersecurity evaluations

Perform comparative analysis across a variety of cybersecurity solutions by working with our experts to replicate your environment. This ultimately helps determine how to enhance security hygiene, protect critical assets, stop advanced threats, orchestrate incident response, govern users and identities, deliver digital trust, and secure the hybrid cloud.

SHI Labs

Fast-track your digital transformation with evidence-based scenarios from SHI Labs.

End-to-end services

We offer a full portfolio of technology services – supported by our multi-disciplinary team of engineers – that helps you test best of breed and emerging products and solutions.

Tours

Visit the Customer Innovation Center (CIC) Showcase to explore our full range of data center, collaboration, security, and networking capabilities.

Product and integrated solution demonstrations

Request live demonstrations, and get briefed on product or solution capabilities with a hands-on presentation of   software interfaces.

Proofs of concepts (POC)

Try out interactive demos, and test plans to dive deeper into concepts. You'll know if your idea is viable for real-world use in just a few days, if not hours.

Pilots and sandbox environments

Whether you bring your own tech or leverage any of our industry-leading partners' solutions, SHI's certified engineers can help you with product comparisons, design validation, benchmarking, multi-vendor solution evaluations, and more!

Assessments

Our experts conduct a full and objective review of your current state, identifying gaps, pinpointing inefficiencies, assessing potential risks, and making recommendations that align with your business and technology outcomes.

Design and deployment

Your IT team will work alongside our skilled engineers to minimize disruption and boost efficiency. This collaboration ensures that you get the most out of your IT investments through our comprehensive range of services.
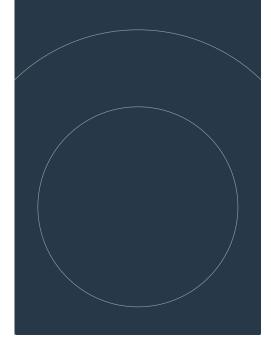

Testing as a service

Free up your resources by outsourcing internal testing to our experts. We'll handle all aspects of testing - from platform evaluations to migration support - allowing you to reduce risks, speed up integration, and ensure the best fit.

Workshops and trainings

Stay ahead of the game with our technology training options, so you can learn about the newest trends, reference architectures, and common deployment mistakes. To get hands-on experience with cutting-edge technologies, join our interactive sessions led by certified experts. Choose from half-day, full-day, or multiple-day options to fit your schedule.

Why SHI

SHI Labs can help support your transformation and budget objectives with high confidence and speed. Our experts have the tools, knowledge, and experience to show you the value of our services by providing an unparalleled hands-on experience. Whether it's selecting, deploying, or managing technology, we're here to ensure you get the best results.
