SHI Healthcare

Elevate and optimize your healthcare IT environment

Keep your patients and practitioners happy with simplified and streamlined technology

Our team of experts will help you select, deploy, and manage the solutions that are best fit for your healthcare organization. Whether you're balancing reaching operational goals, amplifying cybersecurity tools, improving patient satisfaction, or optimizing integrations, we have you covered.

SHI Healthcare gives you access to a world of possibilities with our above-and-beyond services and trustworthy partners that deliver technology designed to improve business operations and caregiver productivity, so you can focus on what really matters, **delivering quality patient care**.

A track record to be proud of

As a $14B company, SHI provides more than $800M in technology solutions to a wide range of healthcare providers. Our customers include:

- Health insurers
- Public and private hospitals
- Academic medical centers
- Public health departments
- Federal medical facilities

Why SHI Healthcare?

Group purchasing organizations
SHI collaborates with leading group purchasing organizations (GPOs), Vizient and Healthtrust, to enable spend management, ease of procurement, and supply chain flexibility for IT products and solutions to GPO Provider members.

Diversity, equity, and inclusion
SHI is recognized as the largest Minority & Woman-Owned Business Enterprise (MWBE) in the United States. Our status as a diverse supplier also informs our commitment to supporting diversity, equity, and inclusion (DEI) across our organization.

Industry association affiliations
SHI is a proud premier foundation partner of the College of Healthcare Information Management Executives (CHIME). CHIME enables its members and business partners to collaborate, exchange ideas, develop professionally, and advocate the effective use of information management to improve health and care throughout the communities they serve.

Solve what's next for your healthcare organization

Transform
Enable interoperability using hybrid infrastructure, cloud, automation, and software-defined solutions to optimize data storage and governance.

Protect
Tailor cybersecurity programs and solutions to proactively defend against threats and ensure patient data is never at risk using NIST to guide the journey of zero trust.

Collaborate
Provide the best experience for clinicians and improve patient wellness by utilizing virtual health applications, mobile point of care devices, and efficient modern desktop solutions for always-on communication.

Optimize
Improve cash flow and process efficiencies with GPO contracts, lifecycle management, and grants to fund required projects.
