

# Funding actualized

Identify grant and funding opportunities to procure the technology your organization needs.

Funding is always a challenge, especially today, as public-serving organizations face pressures to modernize their IT with next-generation data center, cloud, and Internet of Things (IOT) technologies.

These asks can be daunting for any organization, on top of having to identify the right funding sources, meet defined standards and technology requirements, and make strategic procurements. Becoming funding actualized may not seem easy, but with SHI, it can be.

## Grants support

SHI offers complimentary services in collaboration with the Grants Office to help government, education, and healthcare organizations identify and secure grants that will propel their technology projects forward.

## E-Rate funding

With over 30 years supporting K-12 education and library customers, and a decade of E-Rate experience, SHI's dedicated team of E-Rate specialists help you take advantage of your Category 1 and Category 2 E-Rate funding.

## Procurement contracts

SHI understands the important role that contracts play in public sector procurement. We offer over 500+ contract vehicles to choose from, ensuring you get optimal pricing for your technology solutions.

## Organizations that receive funding support

State and local governments

K-12 schools and districts

Hospitals and healthcare systems

Law enforcement and public safety entities

Higher education institutions

Tribal entities

### Benefits

- Additional funding to pursue IT initiatives and projects
- Greater flexibility in funding allocations
- Improved accountability, transparency, and collaboration with other public sector organizations
- Strategic alignment around funding-related objectives
- Training and technical assistance to build capacity
- Improved outcomes for constituents and stakeholders
