

Cloud governance assessment

Obtain a detailed analysis of your posture based on SHI's established baselines and OEM best practices.

Our cloud governance assessment analyzes your governance posture in your Azure or AWS environment to answer two questions: *Where are you now and where do you need to be?*

Scope

Want an informed opinion on how to reduce spending, improve security, identify compliance gaps, and enhance cloud visibility and management? With SHI your cloud governance evaluation is based on our proprietary baselines and OEM best practices, incorporating thousands of services and resource-level checks. Our findings will clearly outline your gaps, provide prioritized recommendations on applicable services, and tell you how to start addressing them.

Duration

- 2-3 weeks

Cloud platforms

- AWS and Azure

Deliverables

- Service specific compliance score based on SHI's established baselines and OEM best practices
- Executive presentation of summarized findings
- Recommended next steps

Related services

- Cloud governance framework (value-add)
- Cloud governance essentials and managed services (paid)

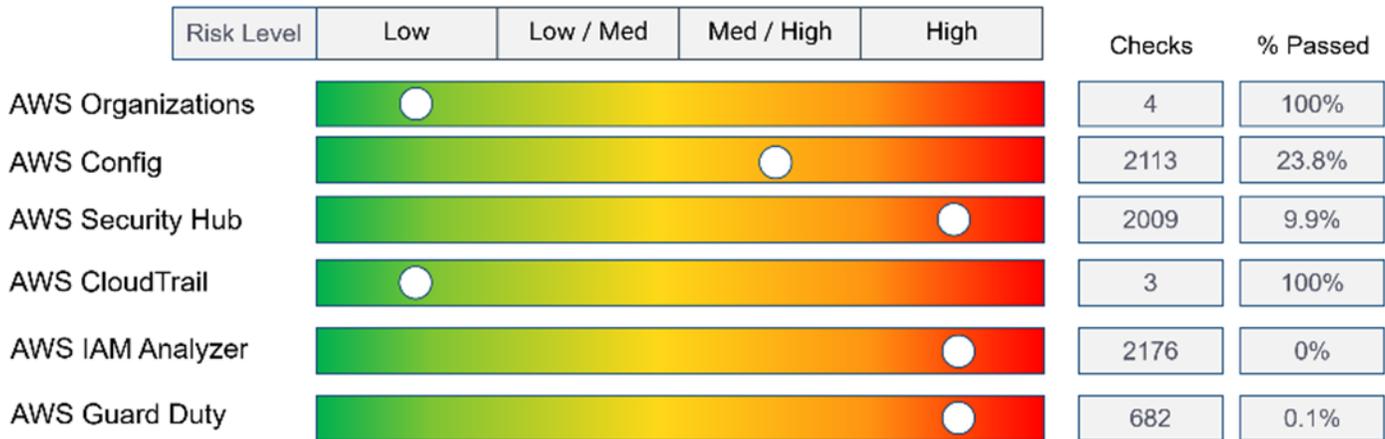

Approach

Planning and deployment		Initial kickoff and deployment of discovery tooling
Week 1 and 2 discovery		Data collection
Week 3 analysis		Analyze data against SHI baselines and OEM best practice and identify gaps
Week 3 review		Present findings and provide recommendations

Executive summary

Account Summary			
Metric	Count	Metric	Count
# Accounts	64	Passed Checks	709
# Regions	17	Failed Checks	6278

Customer responsibilities

Customer must configure a read-only connection for their Azure subscriptions / AWS accounts. SHI will use this connection for discovery and analysis of governance posture.
