

Device-as-a-Service workshop

Evaluate your ideal managed services program. For free.

SHI's expert guidance helps you strategize and realize the benefits of your Device-as-a-Service (DaaS) initiative – all at no extra cost.

Together, we'll go step-by-step through the process of designing and transitioning to an all-inclusive end-to-end managed support services program. You'll learn how to dissect the value of a 'pay as you use' procurement model and create improved employee experiences with a fully operational solution.

Solve what's next for your device procurement with SHI.

Learn how our DaaS experts can help you:

- 1 Lower your long-term costs with **flexible OpEx finance models**
- 2 Choose the device that suits your needs and be in control with our **vendor-neutral selection process**
- 3 Order devices on a **customized self-service portal**
- 4 Leverage fast and efficient **deployment services**
- 5 Reduce downtime and disruptions with **warranty support and advanced exchange**
- 6 Reduce cost of ownership and improve sustainability through **end of life/return services**
- 7 Gain comprehensive management at every stage with SHI's **device lifecycle management**
- 8 Worry less and unburden your IT with our all-inclusive **project management service and support**

Who should attend:

- Key decision makers
- IT support staff
- Imaging experts
- Contract management support staff
- Finance/budget experts
- Purchasing/procurement staff

Your DaaS solution starts with a simple questionnaire.

The right DaaS strategy must meet the needs of your users and your business. That's why we start our DaaS workshop with a brief questionnaire – to best understand your unique use cases and goals.
