SHI Public Sector

Solve what's next for your government or education organization

It's no secret that government and education organizations face complex challenges when trying to improve citizen services with technology. You need to constantly overcome procurement obstacles, budget constraints, talent shortages, outdated legacy systems, and data privacy concerns – just to name a few.

SHI Public Sector has you covered. We support your organization with:

- Dynamic, regionally based accounts teams focused on one vertical

- A dedicated grants team that identifies potential funding opportunities and consults on the application process

- A large team of skilled licensing specialists who help you utilize the most advantageous and cost-effective licensing programs

- Hardware lifecycle management teams who provide full support for your end-user computing needs, from installation and configuration to break/fix and refresh

- Custom configuration and deployment capabilities in our state-of-the-art Integration Centers that can handle customer builds and 3,500 daily devices

- Enhanced customer experience by transforming and protecting infrastructure and data
