SHI

How do small and mid-market companies address evolving cybersecurity threats?

82%

of breaches involve human error

Source

The security landscape is shifting quickly, and threats are increasing.

With so much at stake, following best practices has never been more crucial. Take charge with SHI's security roadmap, developed to help you identify the best solutions for your business.

5 key security challenges

Identity
Credential misuse may seem preventable; however, it leads to 93% of data compromised in cyberattacks. What extra steps do you take to ensure your identity is uncompromised?

Perimeter
Hybrid work and supply chain/third-party risks have increased the attack surface – and bad actors only need one entry point to create a domino effect. How do you protect each environment?

Email
76% of small and mid-market business leaders expect an email-delivered attack will have serious consequences for their organization in the next 12 months. Are you confident in your email security through 2023?

Endpoint
Data breaches take an average of 197 days to uncover. Can your business afford this lost time?
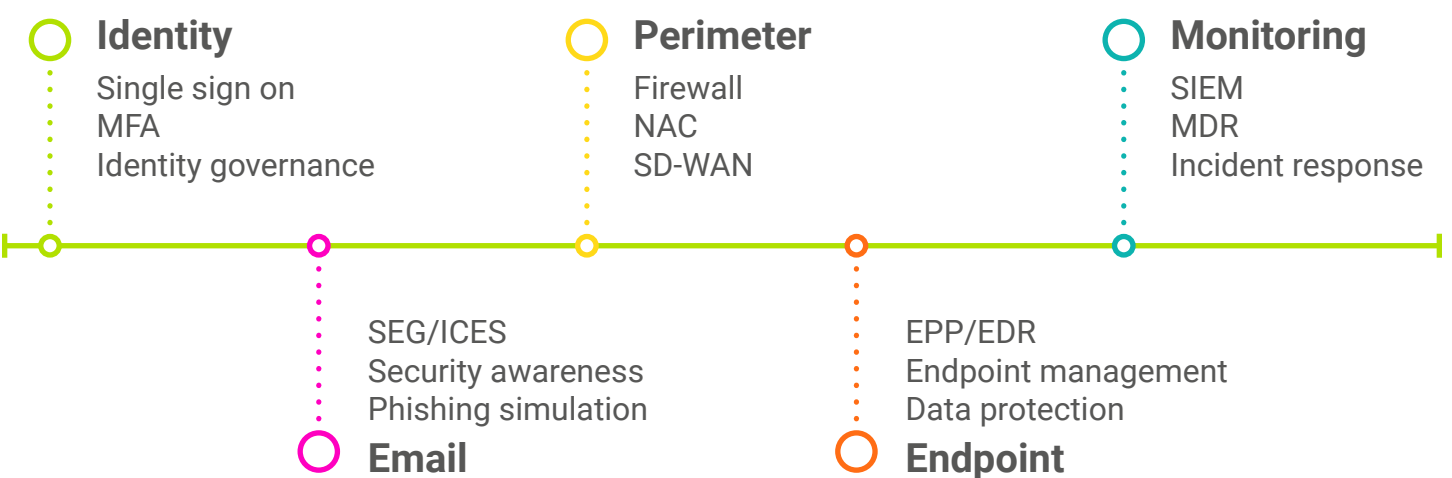

Monitoring and remediation
Consider your cyber strategy: self-remediation or built-in automation to scale protection. Are you confident in your approach?

How do you protect your business from the constantly changing security landscape?

Address cyber challenges with insight, expertise, and resources

SHI provides people, technology, and process-focused cybersecurity solutions to keep your organization ahead of security threats. Using proven best practices and a vendor-neutral approach, we help you combat top security challenges with the right solutions.

SHI roadmaps, labs, and experience

Our industry expertise, trusted partnerships, security assessments, and lab-proven integration strategies help improve your security maturity and manage risk with confidence.

Take advantage of an SHI security roadmap session with one of our experts for clarity on the most significant gaps in your security capabilities. Then, utilize SHI Labs to test and validate how potential solutions work with the tools you already have and ensure they deliver against your unique use case.

We will build an interactive 'show and tell' to reveal the strengths and weaknesses of your current environment integrated with the new technology, giving you all the information needed to make a confident decision in your cyber strategy.

Book your security roadmap review to solve what's next.
