Empowering student success:
**Microsoft 365 for Education tackles learning challenges head-on**

Overview:

There is no cookie cutter approach to how each student learns. The current education landscape has certainly shown as much. To address different learning styles and unlock creativity, schools are asking for the technology that's most capable of serving their student body.
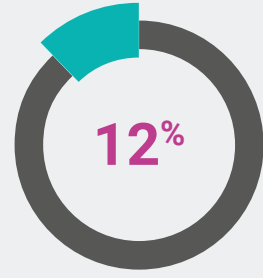

Technology incorporated in the classroom must be designed for students:

80%

Over **80%** of **workplace malware attacks** were experienced in **K-12 education**.

77%

77% of teachers believe **technology** makes them **more effective**.

12%

12% of students **suffer from dyslexia**.

Microsoft 365 for education combats these issues by creating an equitable learning environment for all, helping students succeed in the classroom and beyond.

With immersive and engaging apps, M365 is built to foster educational, social, and emotional well-being.

Unlock creativity in each student

Spark creativity, collaboration, and problem-solving with immersive and engaging apps. Enhance independence for students of all abilities with intelligent data visualization tools.

Promote teamwork

Collaborate and save educators time with a single hub for classes and teams. Easily connect with others and co-author in real time. Meet the needs of individual students with a universal toolkit to connect, share, and communicate in class and out.

Provide a simple and secure experience

Manage users, data, and devices with a single dashboard. Protect identity, apps, data, and devices with intelligent, security enhanced machine learning. Manage data archiving, governance, and discovery.

Accessibility:

Read Aloud:

Experience a text-to-speech app that audibly reads webpages, news, documents, e-books, or your own custom content. These features will not only help students with their assignments, but can also improve their reading speed. Additionally, the app has been proven to offer great assistance to the visually-impaired.

Narrator and Live Captions

Narrator is a screen-reading app that enables students with visual impairments to explore what is on their displays and navigate between menus. Users can choose from multiple languages and a selection of natural-sounding voices to guide them along. For those who are deaf or hard of hearing, the Live Captions tool provides an automatic transcription of any audio and displays it on screen in real-time. Live Captions also integrates with the Windows desktop, so students can read the captions while working in other apps. What's more, users can even customize how the captions appear on the screen.

Translator:

Create a more inclusive classroom for both students and parents with live captioning and cross-language understanding.

Immersive Reader:

Provide a set of tools that help improve both reading fluency and comprehension, building students' confidence as well as their skillset.

Advanced learning:

Learning Accelerators:
Experience a new category of learning tools, helping to support and streamline the creation, review, and analysis of student development across academic subjects. The Progress tools are designed to help teachers personalize assignments, feedback, and instruction with assistance from actionable insights. Learning Accelerators has proven particularly effective at helping close the gap between in-person and remote learning. Tools like Reading Coach and Reading Progress create a space for students to get immediate, interactive feedback while they read. They can see how well they pronounced words and recalled vocabulary, and even what their reading speed is, making them active participants in their own learning.

Minecraft for Education:
Introduce a game-based platform that inspires creative, inclusive learning through play. Explore blocky worlds that unlock new ways to take on any subject or challenge. Teachers can also form their own curriculums and courses in Minecraft for Education, allowing them to create opportunities for students to master the content in an exciting context.

Education Insights:
Provide real-time analytics of student progress and activity in their classes. Educators are presented with meaningful, reliable data to make informed decisions regarding their class teams. Guided by this data, educators have the information they need to ensure that their students' emotional, social, and academic needs are being met.

Microsoft Reflect:
Create a space for students to grow their emotional vocabulary and learn to express their feelings. We have worked with social and emotional experts to create a list of 51 different emotions brought to life by the Feelings Monster, an illustrated character to help students expand their emotional vocabulary.

Career readiness:

Office Suite
When you use Office 365 Education in the classroom, your students gain a suite of skills and applications that their future employers will highly value. Whether it's Outlook, Word, PowerPoint, Access, or OneNote, prepare students for their futures today.

Why SHI and Microsoft

When it comes to Microsoft licensing, no one does it better - or more cost-effectively - than SHI. Our in-house specialized team can help you discover, evaluate, and gain insights around the Microsoft programs and licensing models that are the best fit for your school.

Using our T-36 timeline and lifecycle kit, we assist customers with their renewals and contracts, outlining dates and major events to keep us on schedule for any contract submissions. All the while, the lifecycle toolkit tracks your Microsoft agreement from beginning to end to include any changes in licenses during the course of the agreement. Through successful implementation, adoption, and optimization, SHI will make sure you recognize return on your Microsoft technology investment.

Let us help you solve what's next with Microsoft 365 for education.

To learn more about Microsoft licensing for your school, contact us at PubSecMarketing@shi.com.
