

Power Platform Ideation Lab

Unleash and accelerate innovation!

Power up your organization with SHI's Power Platform Ideation Lab.

SHI's Power Platform workshop is a partially funded 4-week workshop that introduces businesses to the comprehensive, customizable capabilities of the Microsoft Power Platform. Here, you'll learn how to find intelligent insights in diverse data, build low-code solutions to business challenges, streamline processes with no-code automation, and handle routine inquiries at scale with conversational AI—ultimately empowering you to pass the competition.

Experience the synergy.

Choose SHI's Ideation Lab workshop to fuel your unique business processes and gain an edge in your industry. With our guidance, you'll generate innovative ideas, refine them into a concrete vision, and receive a plan for implementing your tailored Power Platform solution.

We will:

- Introduce you to the Power Platform and show you successful implementations in various industries.
- Guide you through ideation exercises to generate innovative ideas for improving business processes.
- Illustrate deployment of a comprehensive and customized solution.

Benefits

- Understand the Power Platform's capabilities and value to your business.
- Generate innovative ideas for improving your business processes.
- Align high-value solutions with goals and values.
- Become more productive, efficient, and agile while reducing costs and improving data management.
