

SHI Federal

Modern IT solutions for a proactive federal government

SHI recognizes the unique needs of federal agencies in your IT modernization journeys

Our commitment to trust, innovation, security, and compliance empowers us to help agencies like yours enable remote secure access, foster cross-agency cooperation, and provide hybrid data center services.

We have dedicated program teams devoted to all key federal organizations

Department of Defense

Homeland Security

Intelligence

Civilian

Congress

Tribes

Courts

SHI's integration centers

Accelerate your time to market (TTM) and drive value across your most critical projects through SHI's secure, New Jersey-based integration centers.

Our certified technicians perform advanced server pre-integrated racking and testing, device configuration and imaging, hardware asset tagging, custom kitting and packing, inventory and logistics management, and more.

Customer Innovation Center (CIC)

Federal customers can use our 8,000+ square-foot CIC to design, educate, demonstrate, deploy, and validate your technology solutions. We help you test out various technology solutions, with workshops and events to gain insight on the latest IT trends.

Core contract vehicles

SHI has access to a wide range of federal contract vehicles that support your IT project needs, including:

- GSA (47QTCA19D005D)
- DOD ESI Microsoft BPA (N66001-19-A-0007)
- NASA SEWP V Category A (NNG15SD53B)
- NASA SEWP V Category D (NNG15SE11B)
- DOD ESI CISCO Catalog (NNG15SE11B)
- Army ITES-SW2 (W52P1J-20-D-0064)

Diverse partner ecosystem

As the largest Minority/Woman-Owned Business Enterprise (MWBE) in the U.S., SHI engages in strategic procurement partnerships to enable your federal agency to meet its organizational goals.

SHI supports federal organizations across the gambit of your IT projects, including:

Hybrid data center

On-premises data centers and cloud-based infrastructure

Modern workplace solutions

Devices, unified communications, and employee experiences

Cybersecurity

Ransomware, email, identity, access, and endpoint technologies

IT lifecycle services

Cost management, operation support, device management
