

Windows 11

Built for the future of work

Unlock the power of Windows 11 to take your organization into the future.

Windows 11 is built for the world of today and tomorrow. As organizations adjust and adapt to modern work styles, Windows 11 enables new and improved features that will allow better collaboration, robust IT management, and an enhanced security baseline for evolving business needs.

Begin your refresh journey to access the latest Microsoft technologies. Discover how SHI can support your transition with expert guidance, solutions, and services. Our team can walk you through all the facets of your upgrade and device refresh journey.

With so many improvements in Windows 11, explore just a sampling of benefits below.

Feature	Description	Why Windows 11
Hardware root of trust	Build confidence with multiple layers of protection enabled by tightly integrated hardware and software.	Windows 11 adds improvements providing confirmation that the device, firmware, and boot process are in a good state and have not been tampered with before they can access corporate resources. These determinations are made with data stored in the TPM.
Network security	Windows 11 Pro creates a secure infrastructure for devices, applications, and users by providing multiple layers of defense from unauthorized access, misuse, and theft.	Windows 11 Pro now supports Hyper-V Firewall, and provides management capabilities for corporate network scenarios that replace the consumer/home control panel in Windows 10 Pro.
Sustainability	Two new sustainability capabilities were launched with Windows 11 to reduce power usage and create carbon aware updates.	Windows 11 Pro comes with two new sustainability features that allow carbon aware and energy-saving capabilities for updated devices. This reduces carbon emission and saves power for your device.

Feature	Description	Why Windows 11
Modern device management (MDM)	Windows 11 Pro supports modern device management with tools like Microsoft Intune and Azure Active Directory. The built-in enrollment client simplifies setup, and the management client synchronizes with the cloud to check for and apply the latest policies.	You manage Windows 11 Pro devices alongside your other devices using the same management tools.
Smarter video conferencing	Look and sound your best in meetings with built-in, intelligent camera effects and taskbar controls.	Smarter video conferencing includes intelligent noise cancelling, background blur, and the ability to instantly share files and mute/unmute right from your taskbar. Optional AI-enhancements improve video conferencing while providing smooth performance.

Why SHI for Microsoft

SHI has partnered with Microsoft for over 30 years and helped organizations of all sizes and industries. Over 17,000 organizations worldwide rely on SHI's concierge approach to help them solve what's next with scalable and cost-effective infrastructure, end-user computing, and cybersecurity solutions.

Contact your SHI account executive today to unlock the security, productivity, and collaboration benefits of Windows 11.
