

SHI's **EULA Risk Mitigation Service** helps you avoid the "risk gap" that occurs when you buy and install software without checking the terms and conditions – which is especially useful for non-strategic, one-off purchases.

Our EULA Risk Mitigation Service helps customers:

### Reduce risk

by implementing a minimum set of terms and conditions for non-strategic purchases.

### Free up time

for procurement, so you can focus on more strategic goals and objectives.

### About SHI

Founded in 1989, SHI is a global solutions provider of IT products and services with a gross sales total of \$14 billion. Our innovative solutions - delivered with world-class support - help you address, acquire, and adopt technologies to solve IT challenges and pursue future milestones. Backed by certified sales and technical specialists, we support all your technology needs and deliver custom IT for every aspect of your environment.
