# Meeting room solutions

Legacy audio-video systems are barriers to productive meetings and collaboration in the hybrid workplace. When meetings can't operate smoothly, users grow frustrated and IT resources get stuck trying to resolve the issues.

Meeting your business goals means building a resilient digital workplace that fosters innovation and improves employee engagement. Select, deploy, and manage the best-fit hardware and software from leading vendors, with user adoption programs and flexible procurement options that maximize your ROI.

- Our experienced engineers operate globally to install, adapt, and manage the leading audio-visual systems, delivering the highest quality standards for our customers.

- Our expert team has the knowledge and experience you can trust. We focus on getting the details right, so you can focus on your business.

- We provide custom solutions, having installed 16,000+ video conferencing projects, including 2,000+ immersive suites.

SHI helps you build:

- **Participant equity:** Create seamless meeting experiences for all your users

- **Immersive experiences:** Enable users to book a room and get a fast start to meetings every time

- **Unburdened IT teams:** Give IT a break with easily managed solutions and ongoing support

- **Streamlined digital workspaces:** Build the best meeting room solution for your business
