

SaaS management

ITAM SaaS management empowers your team with complete visibility and control over your software.

All of your SaaS applications. One platform.

Using our intelligent SaaS management platform, our ITAM experts analyze your software environment with real-time visibility into all your SaaS applications (paid and free). We assess your spend, usage, security, and compliance, allowing you to proactively manage licensing, renewals, shadow IT, and more.

Manage spend

Discover your organization's software subscriptions and receive custom reports on spend, security, and usage data.

Optimize usage

Reveal shadow IT and deep usage metrics, decentralize stack management by team or role, and deprovision unused licenses.

Bolster security and compliance

Audit high-risk apps, comply with data privacy regulations, and monitor unauthorized applications.

SHI's security promise

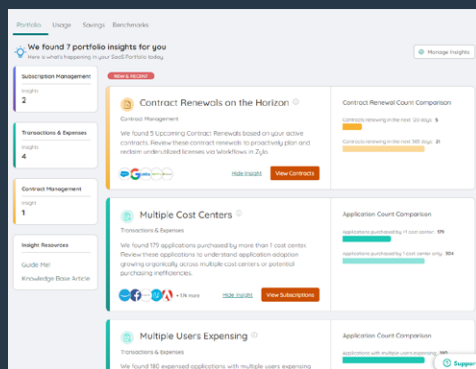

Keeping your data secure is our mission. Our ITAM team will only pull in the SaaS data you want and provide full transparency on how we access and manage it.

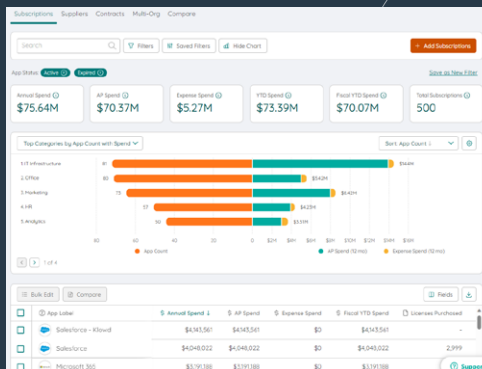

Benefits of intelligent SaaS management

- Utilize a central platform
- Manage spend
- Optimize usage
- Bolster security and compliance
- Receive proactive renewal alerts
- Uncover unused apps and licenses
- Reveal shadow IT

Comprehensive insights

Overall subscription environment

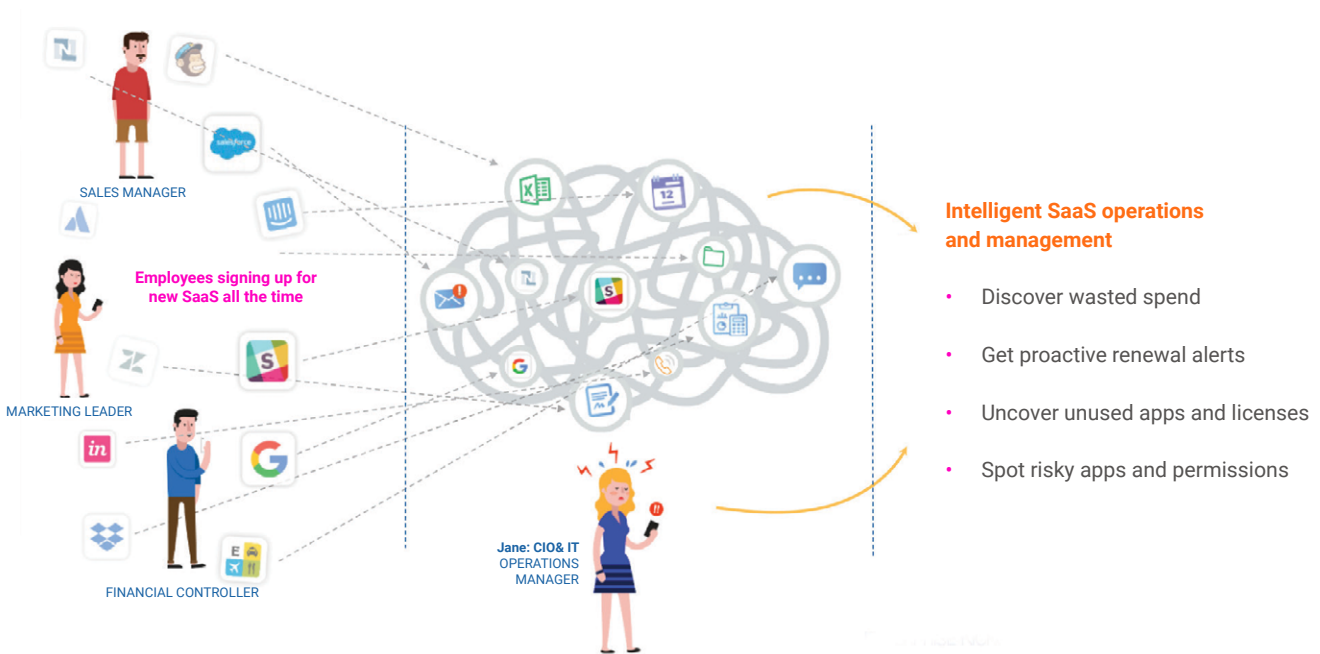

SaaS management

The ease of use that draws users to SaaS applications often leaves IT teams with the messy job of managing the ever-growing number of subscriptions and licenses.

Proper management solves your SaaS nightmare

Intelligent SaaS operations and management

Customer challenge: SaaS sprawl

Solve SaaS sprawl by managing all your applications in one central platform.
