Active Directory and Exchange On-Premises Assessment

Keeping your critical IT in tune

SHI's **Active Directory and Exchange On-Premises Assessment** is a service that provides you with a detailed report on the health and security of your on-premises infrastructure. We analyze your active directory and exchange environments, identify potential risks, and recommend best practices to optimize your performance and security.

Why do you need one?

Active directory and exchange are critical components of your IT infrastructure. However, they can be vulnerable to various threats and issues, such as misconfigurations, outdated software, and unauthorized access. These exposures can compromise your productivity, compliance, and ultimately your reputation.

Fortunately, by using the **Active Directory and Exchange On-Premises Assessment**, you can:

- Gain visibility into your current state, identifying gaps and weaknesses.
- Reduce the risk of security incidents and data loss.
- Enhance your performance and availability.
- Align your infrastructure with industry standards and best practices.
- Plan your future upgrades and migrations.

Deliverables:

- Assessment findings
- Recommendations
- Knowledge transfer

Benefits

- Improved data integrity
- Experienced and certified expert consultants
- Regulatory compliance and security
- Best practice and optimization recommendations
