

Identity and access management

Elevate security, simplify access

Secure and manage digital identities in today's rapidly evolving landscape. Empower your organization by ensuring secure, efficient, and compliant access to digital resources.

What is your organization's risk?

As organizations increasingly move operations online, the complexity of managing digital identities and access rights escalates, introducing significant identity risks. Understanding and mitigating these risks is crucial for safeguarding your organization's digital assets.

Identity risk pertains to the potential threats and vulnerabilities associated with digital identities within an organization. These risks can lead to unauthorized access, data breaches, compliance violations, and financial losses. In the absence of robust IAM strategies, organizations leave themselves open to:

- Credential compromise
- Insider threats
- Privilege misuse
- Regulatory non-compliance

A partnership to transform your business

SHI is dedicated to forging strong partnerships with organizations, guiding them through the complexities of identity and access management with expertise. We recognize that each organization faces unique challenges and requirements in securing and managing digital identities. By working closely with our partners, we tailor our IAM solutions to fit their specific needs, ensuring a seamless integration into their existing systems and processes.

Our team of experts provides continuous support, from initial assessment and strategy development to implementation and ongoing management, empowering organizations to enhance their security posture and operational efficiency.

Protect your identity

A comprehensive IAM framework is pivotal in identifying, assessing, and mitigating identity risks. Key components of an effective IAM strategy include:

- Risk-based authentication
- Privileged access management
- Identity analytics
- Regular access reviews
- User education and awareness

SHI is uniquely equipped to help you adopt a complete identity management solution that can address the security challenges you experience now, and scale to solve what's next.

Solution benefits

SHI's identity solutions will help your organization:

- Enhance security by controlling access to sensitive information.
- Improve user productivity through streamlined login processes.
- Reduce IT costs with automated identity management tasks.
- Ensure compliance with regulatory standards.
- Minimize the risk of data breaches and cyber threats.
- Offer scalable solutions to grow with organizational needs.

SHI expertise and accolades

Our expert credentials and identity recognition:

- 1000+ certifications across Amazon Web Services, Microsoft, and Google Cloud Platform.
- 2023 Fortinet Partner of the Year
- 2023 Cisco Security Partner of the Year – Americas, USA East Area
- 2023 SentinelOne Partner of the Year

Identity governance administration

Streamline access control and ensure compliance by managing digital identities efficiently.

- Identity attestation and certification
- Info sec audit
- Risk-based recertification
- Vulnerability remediation

Access management strategy

Secure, streamline, and manage user access with tailored, scalable solutions.

- Identity and access management
- Privileged access management

IAM active management

Proactively optimize identity processes for dynamic, real-time access control.

- Access management, authorization and authentication
- Federation/directory virtualization services
- Risk-based MFA
- Single sign-on

Stay ahead of what's next

As we navigate the changing digital landscape, the importance of identity and access management solutions cannot be overstated. SHI is at the forefront of solving what's next in IAM, anticipating the challenges of tomorrow and offering innovative solutions today.

By embracing advanced technologies and best practices, and with our SHI Customer Innovation Center, we empower organizations with data-driven decisions to not only address their current identity and access management needs but also to futureproof their security infrastructures against emerging threats and complexities.

SHI understands that the future is not just about responding to changes but anticipating them. Our forward-thinking approach and cutting-edge IAM solutions, we are your trusted partner in securing your digital assets, fostering a secure, compliant, and efficient environment that is ready to solve what's next.
