

Microsoft Entra modernization

Securing identities against today's threats

Identity is today's control plane for digital transformation. However, organizational barriers are blurring between who is in and out of your network. Cloud apps, remote work, and BYOD devices mean data and access credentials are no longer centralized behind traditional network security.

With the record pace of identity attacks, SHI's experts can show you how to prevent tomorrow's data breaches by securing identities today. We will help you find identity risks in your environment, gain insights into your application landscape, and improve your identity security posture. With Microsoft Entra, our certified consultants will assist your organization in strengthening your security posture.

We will:

- Work with you to understand your identity goals and objectives.
- Define your existing and desired identity security posture.
- Demonstrate the benefits of Microsoft Entra, such as:
 - Multi-factor authentication (MFA)
 - Application single sign-on (SSO)
 - Identity governance
 - Lifecycle management
 - Endpoint devices
- Develop a joint action plan based on desired results, recommendations, and next steps.

Deliverables:

- Provide a roadmap and plan for your identity.
- If desired, implement Microsoft Entra features.

Benefits

- Certified and experienced consultants
- Improved security posture
- Actionable guidance for recommendations and best practices to mitigate risks

Security
