

SHIELD Deploy

Automate and maintain M365 architecture

Our SHIELD Deploy module automates the deployment of Microsoft 365 architecture and maintains it over time. Leveraging decades of cybersecurity and enterprise architecture experience, SHIELD provides always up-to-date architecture as a service.

How we help

- **Best-in-class, all the time:** We continually research the most effective architectural configuration for end-user and device security, helping you achieve optimal security without investing time and resources in maintenance.
- **Error-resistant configuration:** We automate the configuration of each user and device, minimizing the risk of human error.
- **One-touch deployment:** Enjoy a familiar administrative user interface, allowing you to roll out users and devices with the click of a button or utilize REST API integration for easy batching.
- **Ready for next-level security:** We offer advanced additional security postures for privileged users, reducing over 85% of your attack surface with privileged access workstations (PAWs).

What makes SHI different:

- **Unparalleled experience:** Our team has worked across thousands of enterprise architecture engagements, from small businesses to large global organizations.
- **Vendor-approved:** As a trusted partner of leading IT vendors, we incorporate expert opinions and design conversations into SHIELD.
- **Security first:** We leverage our deep expertise and experience with cybersecurity technology to ensure that what we deliver is secure, both out of the box and for the long term.

Who we help

We work with organizations of all sizes, at any stage of IT maturity. Whether you're a new business looking to build a secure architecture from scratch or a large enterprise looking to alleviate your IT load, SHI can help answer:

- Are you addressing technical debt?
- Are your IT timelines spread out longer than six months?
- Are you concerned about overloading your IT team?
- Are you continually ensuring optimal enterprise architecture?
- Are you fully leveraging your technology investments?
