

VMware Cloud Foundation workshop

Maximize your onboarding success with guidance from SHI's experts.

Prepare to leverage and maximize the benefits of VMware Cloud Foundation (VCF) with SHI's expert-led interactive workshop. Our architects will provide a technical deep dive into the solutions you'll be using, featuring breakout sessions with a guided experience, design and architecture best practices, integration into your current environment, customer experiences, deployment 'gotchas,' and more.

Practical experience

During our workshop, you'll gain a guided experience and see product demos for VMware Cloud Foundation via our Customer Innovation Center and interactive labs.

Benefits

- Onboarding preparation
- Knowledge transfer
- Hands-on experience
- Design and architecture best practices
- Proof of concept validation

Workshop agenda

8 a.m.	Introductions and VCF overview
8:30 a.m.	VCF use cases and integrations with other VMware products
9 a.m.	Deployment and parameter workbook review
10 a.m.	Cloud Builder configuration and SDDC deployment review
10:30 a.m.	VCF demo
11 a.m.	Q&A

Explore the true value of VMware Cloud Foundation.
