

Data Security Engagement for Microsoft

Identify hidden data security risks and secure sensitive data with SHI's expert guidance.

80% of leaders cited leakage of sensitive data as their top concern around adopting generative AI.

30% of decision-makers lack visibility into the location or nature of their sensitive data, leaving them in a vulnerable position.

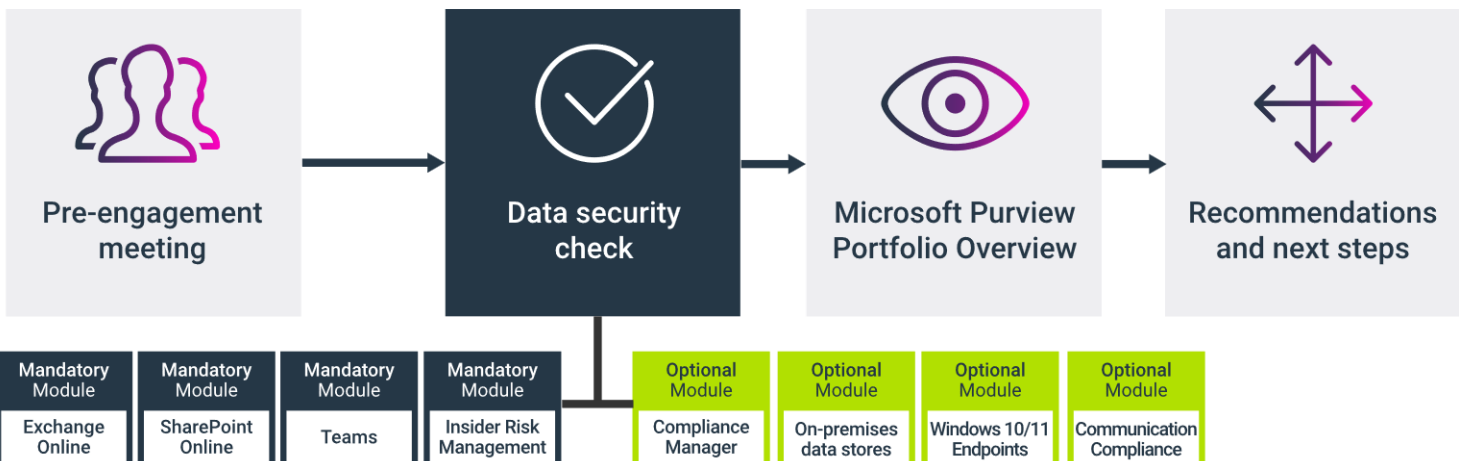

X2

The data sphere is projected to **double** by 2026, bringing unprecedented challenges in data security and governance.

Are you confident in your data security posture?

As a top Microsoft partner, SHI offers a comprehensive Data Security Engagement designed to empower your organization. We combine our deep cybersecurity expertise with the power of Microsoft Purview to provide unparalleled visibility into your data, identify hidden risks, and implement robust security controls.

Our certified security experts will collaborate closely with your team using our **Data Security Engagement** methodology:

Data Security Engagement for Microsoft

Identify hidden data security risks and secure sensitive data with SHI's expert guidance.

By the end of this engagement, our experts will provide:

- A comprehensive Data Security Assessment that includes key findings, prioritized risks, and actionable recommendations, mapped to industry best practices.
- A clear understanding of potential insider threats, with insights into risky user behavior and policy violations.
- Optional Compliance Manager Tenant Assessment report, providing a tailored roadmap to achieve and maintain compliance with relevant regulations (e.g., GDPR, CCPA, HIPAA).
- Set of long-term recommendations on your compliance strategy, with key initiatives and tactical next steps to continuously improve your security posture.

Workshop highlights

- Understand the risks of dark data.
- Identify the risks organizational insiders may impose.
- Assess your environment against key data protection standards.
- Receive an in-depth analysis and report on findings and associated risks of your data estate.
- Learn about tools and services to help mitigate risks.
- Get an actionable roadmap and prioritized recommendations to strengthen your defenses.

SHI's Data Security Check uncovers risks that might be harmful to your organization

Data Security Check is an integral part of the Data Security Engagement, leveraging Microsoft Purview tools and services in an automated process to:

- Discover and classify sensitive data stored in the Microsoft 365 Cloud and analyze for the presence of intellectual property, personally identifiable information (PII), and other confidential data that may impose data security risks.
- Analyze user behavior for events that impose a risk to your organization, such as unauthorized data access, sharing, or exfiltration.

Optional modules can be added to extend the Data Security Check to include on-premises data repositories, Windows 10/11 endpoints, and other critical areas, providing a holistic view of your data security landscape.

Why SHI?

SHI is a global cybersecurity leader and trusted Microsoft partner. Our certified experts leverage decades of experience and deep Microsoft Purview expertise to deliver measurable results. We empower your organization to proactively mitigate data security risks, simplify compliance, maximize your Microsoft investments, and build a culture of security awareness, ensuring your team is equipped to champion data security best practices.

Schedule a Data Security Engagement consultation and take the first step toward a more secure data environment. [Contact your SHI account executive or SHI's Microsoft experts to learn more.](#)
