

Threat Protection Engagement for Microsoft

Leverage next-generation Microsoft security tools, collaborating with SHI and Microsoft experts

Are you keeping pace with today's threat landscape?

Maintaining a robust security posture in today's complex cloud environment feels like an uphill battle. Many organizations struggle, from facing a relentless barrage of increasingly sophisticated phishing campaigns to enforcing secure password protocols and preventing sensitive data exposure — and the list goes on.

Improve your security posture with SHI's Threat Protection Engagement

As a top Microsoft partner with decades of cybersecurity experience, SHI offers a comprehensive assessment and remediation plan, providing peace of mind and resilience against advanced persistent threats. Our Threat Protection Engagement combines our expertise with Microsoft's advanced security solutions.

Our certified security experts will work alongside your team, leveraging Microsoft's advanced threat intelligence and our proven methodologies to identify, analyze, and prioritize threats specific to your organization. You'll gain visibility into immediate threats across email, identity, and data, plus clarity and support on how to remediate vulnerabilities.

The SHI advantage

Given the volume and complexity of identities, data, applications, devices, and infrastructures, it's essential to understand your organization's current security posture and how to mitigate and protect against future threats.

By attending this engagement, you can:

- Identify current, ongoing security threats and discover vulnerabilities across your organization.
- Walk away with actionable next steps based on your specific security needs, objectives, and existing infrastructure.
- Document your security strategy to key stakeholders.
- Accelerate your security journey and optimize ROI using the latest Microsoft security tools and best practices.

Why SHI?

As a top Microsoft Gold Partner, our certified experts leverage decades of experience and the latest Microsoft technologies to build robust security postures. We offer a holistic approach, aligning proven security strategies with your business objectives to deliver measurable value across your organization.

Threat Protection Engagement for Microsoft

Leverage next-generation Microsoft security tools, collaborating with SHI and Microsoft experts

Who should attend

The engagement is intended for cybersecurity leaders and practitioners, including:

 Chief information security officer (CISO)	 Chief information officer (CIO)
 Chief security officer (CSO)	 IT security architects
 IT security administrators	 IT security operations (SecOps)

What to expect:

During this engagement, we go beyond generic assessments, working side-by-side with your team to understand your specific challenges, identify active threats, and develop a prioritized remediation plan, including:

- Analysis of cybersecurity threats targeting your organization.
- Actionable recommendations aligned with Microsoft's best practices to help immediately mitigate identified threats and vulnerabilities, and minimize your risk exposure.
- Complete visibility into vulnerabilities within your Microsoft 365 cloud and on-premises environments to better understand, prioritize, and address vulnerabilities and misconfigurations across your organization.
- Long-term recommendations from SHI's Microsoft experts about your security strategy, with key initiatives and tactical next steps.
- Modular approach, allowing you to select three out of four available specialized modules that best align with your organization's needs and risk profile.
