

Productivity Suites

Innovate, collaborate, and build superior hybrid environments

To ensure your digital workplace succeeds, your users need to seamlessly adopt new productivity tools that are secure, accessible, and cost-effective. But doing so shouldn't restrict their freedom to choose how they work, collaborate, and deliver results.

SHI offers a comprehensive suite of modern productivity tools and accelerators to help drive the adoption of your ideal digital workplace and enhance your employee experience.

Our service combines product knowledge and user understanding to scope, implement, and optimize the adoption of leading productivity tools, while managing seamless operations for your digital workplace.

SHI collaborates with leading productivity partners, including:

citrix™

Google

Microsoft

SHI's productivity suites help create an improved, inclusive digital workplace.

Productive

- Unlock employee potential with powerful productivity tools.
- Empower users to work from anywhere with effective mobility features.
- Optimize business processes and accelerate workflows.

Seamless

- Lessen the burden on IT with simplified administration.
- Automate security and decision-making processes.
- Minimize data loss with built-in policies that plug leaks.
- Expertly assess, plan, migrate, and deploy with SHI.

Transformative

- Reduce costs and transform IT with agile updates and ease of management.
- Upgrade to modern productivity tools powered by the cloud.
- Maintain shared purposes and goals across your organization.
- Encourage innovation and help create new business value.

Collaborative

- Optimize remote work and collaboration.
- Reduce friction between internal teams.
- Deliver better and faster results with real-time coordination.
- Minimize redundant work across teams.

Productivity Suites

Innovate, collaborate, and build superior hybrid environments

Your productivity tools should cater to your unique needs. To choose the right solutions, you need to thoroughly understand your environment. We can help you answer these questions and more:

1

What are the priority tools and platforms you need to drive better business results?

2

What are the probable causes impacting employee productivity?

3

What steps should you take to remediate any underlying issues?

4

What is your baseline, where are you currently, and how can you improve?

We're here to support your needs

Our productivity experts help you gain deep insight into your current state, so you can easily achieve your present and future needs. With our guidance, you can follow our proven method for success.

Assess

- Assess your current environment.
- Identify device OS and compatible productivity solutions.
- Demo and review compatible solutions.
- Consult and advise on next steps.
- Determine best-fit solution(s) for your workforce.

Plan and design

- Plan deployments for a seamless transition.
- Design your solution(s) and architecture.
- Devise a migration plan.
- Establish a change management process.

Build and deploy

- Conduct digital transformation deployments.
- Perform service delivery for support and maintenance.
- Conduct user adoption and training programs.
- Leverage advanced analytics and reporting.
- Customize and integrate with third-party tools.

Are you ready for success?

Schedule a call with our modern workplace experts to discover how SHI can help you solve what's next for productivity solutions.
