

Extended reality (XR)

Your partner for every step of your XR journey.

Extended reality (XR) creates a multi-dimensional experience that blends the digital and physical worlds into immersive and interactive experiences. However, IT teams often grapple with XR deployment complexities: device selection, integration hurdles, and security vulnerabilities.

Our Next-Generation Device Lab offers the latest XR devices, allowing you to experiment to find the best fit. This minimizes the risk of investing in the wrong tech and ensures compatibility with your existing systems. Device as a service (DaaS) lets you lease devices without worrying about maintenance and disposal, giving you the latest technology without breaking your budget. DaaS also eases the burden of device lifecycle management – a key IT pain point.

We understand the pressure IT teams face to deliver impactful XR solutions. Our experts help you choose the right XR products and services from top partners like ManageXR and Microsoft to enhance audience engagement and meet evolving expectations for immersive and interactive experiences.

Transform and future-proof your business with XR

Improve your user experience: Deliver rich, immersive experiences for your customers and stand out from the competition.

Increase efficiency and lower costs: Leverage real-time data access and remote supervision.

Attract and retain top talent: Improve virtual learning and provide realistic training for high-risk conditions, while giving your employees the latest devices.

Accelerate product development: Create new products faster with secure and collaborative cross-team work.

EASILY CREATE AND DEPLOY IMMERSIVE EXPERIENCES WITH SHI

Awareness

- Solution presentations and demos
- Proofs of concept (POCs)

Deployment

- Vendor-neutral solution deployment
- Custom development
- Integration

Content creation

- Application development
- 3D modeling
- 360° video capture

Strategic consulting

- Solution architecture
- Market intelligence
- Advice and support

Extended services

- XR device as a service
- XR pilot service
- End-user training through Lenovo

Extended reality (XR)

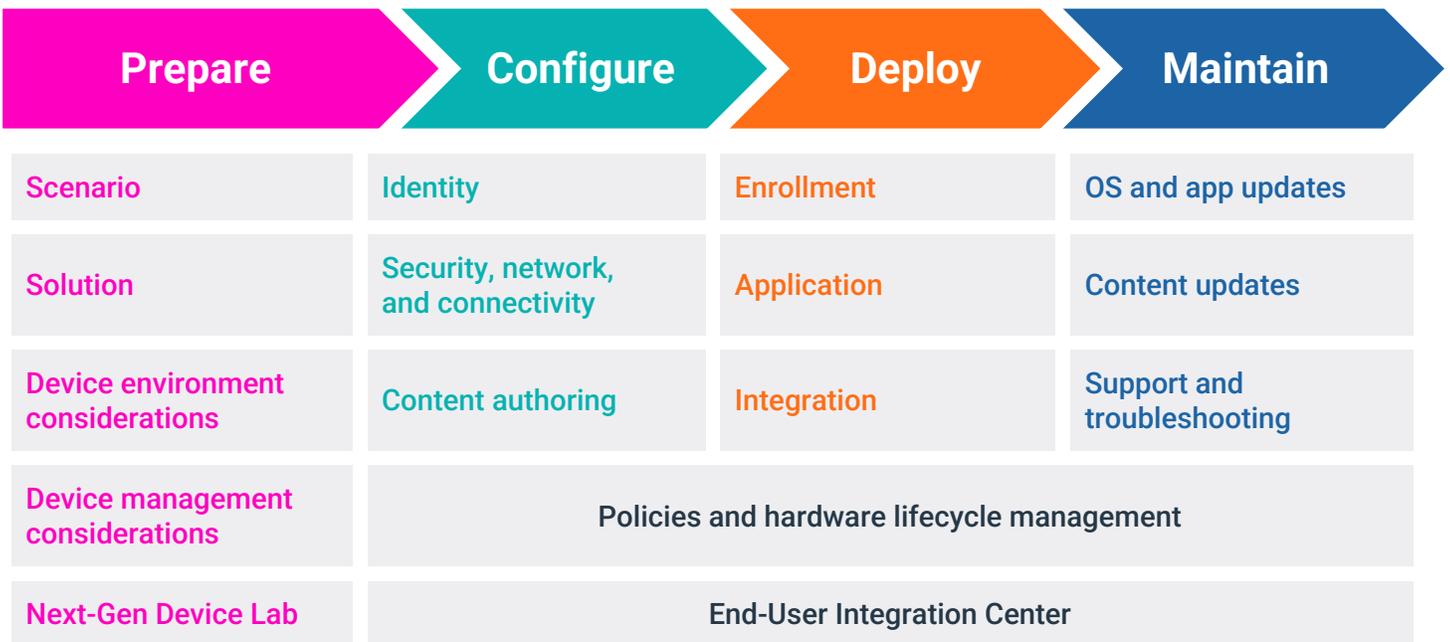

Customized end-to-end XR solutions for your workplace.

Our comprehensive services address the critical needs of IT teams, from initial planning to ongoing support. Our experts provide:

 Vendor-neutral device expertise	 Skills and specializations	 Industry-leading content development platforms
 Consistent experiences across the value chain	 Customer innovation labs for XR policies	 Pre-built or customizable for your needs

Transform your workplace with SHI's XR services

As a next-generation technology, XR is revolutionizing not only how we live and play but also how we work and learn. With SHI's end-to-end solutions, you can seamlessly integrate XR into your modern workplace. From our Next-Gen Device Lab for testing devices to our End-User Integration Center for configuring and deploying solutions, we streamline the entire process, reducing the burden on IT.

Contact our modern workplace experts to start solving what's next for immersive workplace technology.
