

Managed workplace services

Streamline IT operations, empower employees, and optimize costs with a single, predictable contract.

IT teams are facing growing complexity. Vendor sprawl, rising support costs, and the pressure to deliver great digital employee experiences are roadblocks for digital transformation. Fragmented vendor support and inconsistent SLAs raise user and IT frustration.

SHI's managed workplace services is a customizable solution that integrates with your existing workflows to deliver proactive, predictive IT support, secure device management, and full lifecycle services from persona-based procurement through asset recovery.

The result? Increased flexibility and scalability, reduced costs, higher productivity, stronger security, and enhanced employee and customer experiences.

A custom service that meets your needs

No matter where you are in your IT journey, SHI's managed workplace services are customizable and designed to integrate seamlessly with your IT environment to optimize support and raise the bar for IT support.

Key questions CIOs should ask before choosing managed services

- Are your IT costs predictable and flexible enough to support growth?
- How much productivity is lost due to device issues or delayed support?
- How much time is spent managing vendors and juggling contracts?
- Does your device disposal process meet all compliance and security standards?
- Is your device lifecycle optimized for speed, security, and sustainability?
- Can you clearly measure how new technology impacts productivity and customer satisfaction?
