

# IBM ILMT Health Check Assessment

Strengthen compliance. Cut costs. Be audit ready.

## Take control of your IBM software estate

Managing IBM licenses in complex virtualized environments is a challenge, carrying substantial financial risk. Our IBM ILMT Health Check Assessment offers a clear path forward to maintain compliance, minimize audit risk, and maximize your software investments.

## What's included in your assessment?

- **ILMT deployment review:** Comprehensive evaluation of your existing ILMT architecture, infrastructure, and version to ensure optimal setup.
- **Inventory accuracy check:** In-depth analysis of data quality, agent coverage, and product discovery to confirm complete visibility across your environment.
- **Compliance gap identification:** Detailed assessment highlighting discrepancies between deployed and licensed software, enabling proactive remediation.
- **Reporting and process analysis:** Review of report generation, retention, and submission practices to support seamless audit readiness.
- **Remediation and optimization roadmap:** Actionable, prioritized recommendations for closing compliance gaps and improving license management efficiency.

## Key benefits

- **Reduce reporting risk:** Identify and address ILMT reporting issues before they lead to operational challenges.
- **Improve visibility:** Gain clearer insights into deployment data to support more informed software management decisions.
- **Enhance reporting accuracy:** Validate ILMT configuration and processes for reliable, reporting documentation.
- **Expert guidance:** Leverage SHI's IBM specialists for industry-leading best practices.

## Who should leverage this assessment?

- Organizations running IBM software in VMware, Hyper-V, or other virtual environments.
- Teams preparing for IBM audits or annual license reviews.
- IT, software asset management (SAM), and procurement leaders aiming to optimize IBM license management.

## Why SHI?

With decades of licensing expertise and a proven track record, we deliver actionable insights and tailored support to ensure your IBM environment remains secure, compliant, and cost-effective.
